organizing the world's business information

Organizing the world's
business information to answer
questions about the companies
you want to do business with

B2B search has 3 key data points:

250M+ companies

1,000s of markets

Billions of people

The problem:

There is no effective, reliable way for professionals to ask business questions and get credible intelligence supported by data.

- when you buy a CRM it comes empty
- everyone is re-collecting the same information
- everyone is re-creating the same spreadsheets
- 99% of knowledge workers can't afford consultants
- PDFs, reports, etc. are not structured or searchable
